Web Developer Assessment (HTML, CSS)

The second page of this document has a simple design for an application landing page. You are to use the design to mockup its HTML and CSS as your assessment. Feel free to use **<u>Bootstrap</u>** or any other framework you are familiar with.

After you are done, zip up your HTML project folder, and any other assets used for the assessment. Submit as an attachment to the email addresses specified (see email for instructions) with the subject:
**"Software Developer Assessment (HTML, CSS) - <Surname, Firstname>"**.

Notes:
- Read the email sent to you for this assessment carefully for further instructions not mentioned here.
- You don't need to use the exact images seen in the design. You can search <u>pexels.com</u> for a good quality image to use instead.

Below are style guides to assist you:
